NOTES:

- The 2006 Tax Relief and Health Care Act (TRHCA) required the establishment of a physician quality reporting system, including an incentive payment for eligible professionals who satisfactorily report data on quality measures for covered professional services furnished to Medicare beneficiaries during the second half of 2007. CMS named this program the Physician Quality Reporting Initiative (PQRI). The PQRI was further modified as a result of the Medicare, Medicaid, and SCHIP Extension Act of 2007 (MMSEA) and the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA). In 2011, the program name was changed to Physician Quality Reporting System (Physician Quality Reporting).
- Patients: ESRD; 50 and older; and chronic kidney disease
- Patients: 65 and older
- Section 4105
- Patients: Above age 65
- Patients: Below age 65
- QMs service Minnesota and surrounding areas
